## SUMMARY

---

I'm a passionate junior Full Stack Developer with a love for turning ideas into interactive and functional solutions. With a strong foundation in both front-end and back-end technologies, I am eager to apply my skills and knowledge in both an individual and collaborative setting.

## EDUCATION

---

**DigitalCrafts | Certificate in Software Development | Atlanta, GA** **June 2023 – October 2023**

- 17 week Full stack software development training program covering technologies including, but not limited to JavaScript, including an emphasis on frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

## TECHNICAL SKILLS

---

**Front End** | HTML, CSS, Javascript, React, Redux, Node.JS, Bootstrap, Express, Tailwind | **Design** | Figma, Photoshop

**Back End** | PostgreSQL, Sequelize, AWS, Supabase, MongoDB

**Developer Tools** | Git, Github, npm, Agile Methodology, Scrum Methodology, TDD

## SOFT SKILLS

---

Teamwork, Problem-Solving, Adaptability, Communication, Leadership, Initiative

## PROJECTS

---

**EcoQuest** | [Live Website](#) | [Github](#) | [Video Walkthrough](#) **October 2023**

*Lead a team to create a website that makes users more aware of their carbon footprint and helps them lower it.* Tech stack included: HTML | CSS | JavaScript | Supabase | React | Tailwind | Node.JS

- Ran daily standup meetings, ensuring effective communication and progress tracking.
- Researched and created a carbon footprint calculator.
- Self-studied Tailwind and Supabase, showcasing adaptability and commitment to always learning.

**Meir's Meteorology** | [Live Website](#) | [Github](#) | [Video Walkthrough](#) **October 2023**

*Solo project where I developed a weather app using React and Vite that provides real-time weather data and forecasts for various cities.* HTML | CSS | JavaScript | React | Vite

- Made all temperatures toggleable from imperial to metric measurements for user customization.
- Backgrounds dynamically adjust with current weather conditions, elevating user immersion.

**Pet Nook** | [Github](#) | [Video Walkthrough](#) **September 2023**

*Collaborated on a 2-person development team to create a platform for re-homing and adopting pets in need.* HTML | CSS | JavaScript | Sequelize | Node.js | PostgreSQL

- Implemented user authentication and password security.
- Integrated an email API using Mailgun to enable users to email each other.
- Demonstrated initiative by self-studying AWS RDS and AWS S3 to expand project capabilities.
