MEIR SOSKIL

FULL-STACK DEVELOPER

(443)-695-5839   Baltimore, MD

meirsoskil@gmail.com   LinkedIn

SUMMARY

Motivated Junior Full Stack Developer passionate about creating interactive applications. Proficient in React, JavaScript, API integrations, and experienced with low-code platforms, I'm eager to apply my skills on impactful projects as I continue to grow as a developer.

WORK EXPERIENCE

Software Developer Intern
System Automation | Columbia, Maryland   **June 2024 - Present**

- Created a widget enabling users to add license data to Google or Apple wallets via their APIs.
- Coordinated with the development team to integrate the widget into existing systems.
- Refactored form widget code, reducing loading times by over 45%, improving performance and user experience.
- Optimized the form for mobile devices, enabling customer feedback collection during the annual user conference.

Web Developer Intern
EEL Energy Solutions & Technologies | Remote   **January 2024 - March 2024**

- Led user account functionality and order processing within the WordPress environment.
- Utilized PHP to develop and implement custom functions, enhancing website functionality.
- Collaborated remotely to integrate features and optimize website performance.

SKILLS

- **Languages:** HTML, CSS, JavaScript, TypeScript, SQL
- **Frameworks & Libraries:** React, Redux, Vite, Node.js, Express, Bootstrap, Tailwind CSS, MUI (Material UI), Sequelize
- **Databases:** PostgreSQL, Supabase, MongoDB
- **Tools & Platforms:** Git, GitHub, Bitbucket, npm, WordPress, Scrum Methodology
- **Design Tools:** Figma, Photoshop
- **Cloud & APIs:** RESTful APIs, Data Modeling
- **Soft Skills:** Teamwork, Problem-Solving, Adaptability, Communication, Leadership, Initiative

PROJECTS

EcoQuest Live Site | Github | Video Walkthrough   **October 2023**

Led a team in creating a website that raises user awareness of their carbon footprint and offers quests to help reduce it.
HTML | CSS | JavaScript | Supabase | React | Tailwind | Node.JS | Vite

- Conducted daily standup meetings following Scrum methodology.
- Developed a carbon footprint calculator, allowing users to measure their impact and encourage sustainable behavior.
- Self-taught Tailwind CSS and Supabase, reducing development time and enhancing overall project efficiency.

Meirs Meteorology Live Site | Github | Video Walkthrough   **October 2023**

Developed a weather app using React and Vite that provides real-time weather data and forecasts for different cities.
HTML | CSS | JavaScript | React | Vite

- Integrated real-time weather data from multiple APIs.
- Enhanced user experience with dynamic background images that adjust based on current weather conditions.

EDUCATION

Certificate in Software Development, DigitalCrafts, Atlanta, GA   **June 2023 – October 2023**
Completed a 17-week full-stack software development program focused on JavaScript, including frameworks like React/Redux, server-side technologies such as Node.js, Express, and PostgreSQL, along with practical experience in API integration.
